Age why young people not seek help for cyberbullying? This research will investigate the help seeking and coping methods young people use to deal with cyberbullying. As a researcher I ask for your assistance because, as a young person, what you think matters. This research may help your parents and teachers understand cyberbullying and how you feel about it, and may assist in helping future young people, like yourself, from harm.

WHAT DO I NEED TO DO?
Your participation will involve completing an online survey at a time that is suitable for all. It will take approximately 20-30 minutes, and some of you will be invited to a possible follow-up 20-30 minute interview. Your participation in this project is voluntary. If you do agree to participate, you can withdraw from participation at any time during the project without comment or penalty.

WHAT DO I GET FROM IT?
Being part of this study will raise awareness about being safe online. It may also benefit other young people, as findings may help to inform a guide on how to deal with or avoid negative online experiences such as cyberbullying.

ARE THERE ANY RISKS?
There is no personal risk beyond that experienced in day to day activities. Participation involves an anonymous, online survey, with yourself and your school remaining unidentifiable. Interviews will be held at the school, in a space which is private yet visible by others. Should you feel in need of support, a list of counselling services will be given to you and the school counsellor is available to you.

WILL PEOPLE KNOW WHO I AM?
All comments and responses will be treated confidentially. This means that any information that can identify you will be removed as soon as possible, so that you will not be identified in any publications or results. However, as a mandated notifier, I will need to take action should any of your responses suggest you are in need of help or are at risk. If this occurs, actions will take place with respect to what is best for you and your wellbeing. Your information will remain confidential. You do not have to share any information about illegal behaviours. However, this survey is anonymous and there is no identifying information that can personally identify you. All data will be stored for an additional 5 years after the completion of the project under password protection by the researcher.

HOW DO I GET INVOLVED?
If you would like to be a part of this, please ask your parent/guardian for signed permission, sign the attached consent form yourself, and return to your school.

I WANT TO KNOW MORE...
Please contact Larisa Karklins (details above) if you have any questions or if you would like to know more.

This project has been approved by the University of South Australia's Human Research Ethics Committee, and the Department for Education and Child Development Ethics Committee. UniSA is committed to researcher integrity and the ethical conduct of research projects. However, if you do have any concerns or complaints about the ethical conduct of the project you may contact the Executive Officer of this Committee, Tel: +61 8 8302 3118; Email: vicki.allen@unisa.edu.au, or my Supervisor, Dr Barbara Spears, Tel: +61 8 8302 4500; Email: Barbara.Spears@unisa.edu.au. The Research Ethics Officer is not connected with the research project and can facilitate a resolution to your concern in an impartial manner.
THANK YOU!
